

Job Description for Full Stack Developer

Role	Full Stack Developer
Position Type	Full Time
Job Type	Experienced
Location	Gurgaon

About Us

At Digilytics, we build and deliver easy to use AI products to the mortgage and secured lending sectors. In an ever-crowded world of clever technology solutions looking for a problem to solve, our solutions start with a keen understanding of what creates and what destroys value in our clients' business.

Founded by Arindom Basu, the leadership of Digilytics is deeply rooted in leveraging disruptive technology to drive profitable business growth. With over 50 years of combined experience in technology-enabled change, the Digilytics leadership is focused on building a values-first firm that will stand the test of time.

We are currently focussed on developing a product, Digilytics Revel, to revolutionise loan origination for mortgages and secured lending.

The leadership strongly believes in the ethos of enabling intelligence and fostering growth across the organization. Digilytics is headquartered in London, with presence across India and the US.

Our Values

F Free-thinking:
New technologies, business ideas, operating models

O Optimistic:
Deal with issues and challenges head-on

C Committed:
To deliver results and value for clients

A Analytical:
In designing solutions and managing execution

L Loyal:
To our clients and our employees

About the role

We are looking for experienced Full Stack Developers, who have the aspirations and appetite in working in a start-up environment, and with relevant industry experience to make a significant contribution to our Digilytics™ platform and solutions.

The nature of our projects requires the development of easy-to-consume solutions for complex and data intensive business problems. You will help develop the Digilytics™ product with features like ingesting data through digital, IoT, mobile and other data varieties and developing AI and analytics-based solutions. You will also help develop client-specific web and mobile solutions to business problems leveraging the analytics. Your primary focus will be in architecting and developing the product to world-class standards.

Responsibilities

- Testing and maintaining high quality full-stack solutions.
- Designing, implementing and maintaining data structures using technologies such as Java, Spring, Hibernate(JPA) , React Native, Rest APIs and data bases such as MySQL, SQLServer and MongoDB.
- Interacting with clients and gathering and documenting business requirements and solution designs to a high degree
- Recruiting and managing other personnel as relevant and achieving a high performance for self and the team
- Ensuring that clients are satisfied and do not have any negative feedback about the Company's and the Executive's provision of services
- Participation in sales and client relationship management as relevant

Desired Skills

- Strong knowledge of DS, Algorithms & OOPs concepts
- Java 1.8+, Angular 2+
- Spring Boot, Hibernate, JPA
- RDBMS database (MYSQL, MSSQL preferred)
- Microservices Architecture
- JavaScript, ES6 Features, HTML, CSS
- Experience in the Version Control System like GIT.

Good to Have

- Experience with Microservices Architecture
- Experience with Redis, Kafka, Feign Clients
- Exposure in Cloud Environment, Azure/AWS
- Exposure to Kubernetes/Docker
- Experience of Agile/SCRUM way of working

Education Background

- A Bachelor degree, or equivalent, preferably in Software Engineering and Computer Science
