Job Description for Senior Java Developer/ TL Java

Role	Senior Java Developer/ TL Java
Position Type	Full Time
Job Type	Experienced
Location	Gurgaon

About Us

At Digilytics™, we build and deliver easy to use AI products to the secured lending and consumer industry sectors. In an ever-crowded world of clever technology solutions looking for a problem to solve, our solutions start with a keen understanding of what creates and what destroys value in our clients' business.

Founded in 2014, by Arindom Basu, the leadership of Digilytics™ is deeply rooted in leveraging disruptive technology to drive profitable business growth. With over 50 years of combined experience in technology-enabled change, the Digilytics™ leadership is focused on building a values-first firm that will stand the test of time.

We are currently focussed on developing a product, Revel FS, to revolutionise loan origination for mortgages and secured lending. We are also developing a second product, Revel CI, focused on improving trade (secondary) sales to consumer industry clients like auto and FMCG players.

The leadership strongly believes in the ethos of enabling intelligence across the organization. Digiliytics AI is headquartered in London, with presence across India.

About the role

We are looking for experienced developers, who have the aspirations and appetite in working in a start-up environment, and with relevant industry experience to make a significant contribution to our Digilytics™ platform and solutions.

Responsibilities

- Understand the DigilyticsTM vision and help in creating and maintaining a development roadmap
- Interact with clients and other team members to understand client-specific requirements of the product
- Contribute to product development team and deliver product releases in a timely manner
- Ensure the quality of the product delivered

- Develop client-specific solutions using the product
- Liaise with multiple stakeholders and coordinate with our onshore and offshore entities
- Respond to client feedback

Expected and Desired Skills

- Hands-on experience with:
  - Java, Spring Framework, Hibernate, JPA, Spring Boot
  - Databases like Oracle, MySQL, MongoDB etc.
  - REST/SOAP web services and Service Oriented architecture
  - JavaScript/JQuery/HTML/CSS
  - Experience on AWS, Azure or Google Cloud
- Strong programming skills and deep understanding of technical delivery
- Excellent understanding of analytical techniques and technology landscape
- Excellent problem solving skills
- Good interpersonal skills and the ability to communicate ideas clearly at all levels
- Ability to work in unfamiliar business areas and to use your skills to create solutions
- Ability to both work in and lead a team and to deliver and accept peer review
- Flexible approach to working environment and hours to meet the needs of the business and clients

Experience

- A start up mind set with proven experience working in both smaller and larger organisations having multicultural exposure
- Between 5-7 years of experience working closely with the relevant technologies, and developing world-class software and solutions
- Domain and industry experience by serving customers in one or more of these industries - Financial Services, Professional Services, other Retail Consumer Services

Education Background
- A Bachelors degree, or equivalent, preferably in Software Engineering and Computer Science
