

Digilytics AI: Revolutionizing Mortgage Origination, Leveraging Artificial Intelligence

We are Digilytics AI. Category leader of easy-to-use SaaS AI products for mortgage origination.

Our product, Digilytics™ RevEI is particularly suited for specialist lending, which offers mortgages and other secured loans to customers with diverse backgrounds.

We have seen, borrowers with non-standard incomes and inadequate credit history struggle to get loans from high street lenders and go to specialist lenders. Our product helps specialist lenders so that it becomes easier for them to get loans.

We aim to deliver AI-enabled business solutions – smarter, faster, and cheaper to the mortgage and specialist lenders so that they can help people and reduce their struggle to qualify for a loan.

We are delighted that our commitment towards diversity and inclusion, has been recognized by FT Adviser Diversity in Finance Awards.

Proud Winner of Financial Adviser's Product of the Year Category 2020

About Digilytics AI

Digilytics AI is deeply rooted in leveraging disruptive technology to drive profitable business growth. We at Digilytics™ are change-makers who enjoy challenging the status quo and disrupting the industry with our authenticity and innovation. We are freethinkers, optimists, committed can-doers, analytical and loyal to our clients and colleagues.

Founded by Arindom Basu, Digilytics™ is a leading provider of easy to use AI solutions, headquartered in London, UK with presence across the United States, and India.
